

Mirtec's sign frames are made by standard extrusions that can accept a variety of insert materials with a small degree of flexibility, such as vinyl, acrylic, wood veneer, paper and aluminum.

The Fascia system's insert sizes are the same as their corresponding part numbers. For instance, part no. Fas.RI 6x8.00 has an insert size of 6" x 8". Please keep in mind while specifying your signs that the frame sizes are slightly larger than the insert sizes and part number. See the chart below for reference.

$$* h1 = H - (h2 + h3 + \dots)$$

- * h1 indicates the balance between H and the joining options
- H indicates the total of all inserts heights
- h2 / h3/ Paper extrusion / in out slider / are standard heights of panel options

Acrylic Panels and Extrusions Combination

Fascia system			
	Insert=h...	w	
* 1	h1 - Add Insert	xx"/xxmm	Sign Part no.
2	Insert 1	2"/51mm	Sign Part no.
3	Insert 2	4"/102mm	Sign Part no.
4	Divider	0.12"/3mm	Sign Part no.
5	Paper extrusion 1	1.18"/30mm	Sign Part no. Paper insert
6	Paper extrusion 2	2.1"/53.2mm	Sign Part no. 1.02"/26mm
7	In / Out extrusion	0.76"/17mm	Sign Part no. 1.8"/45.6mm
