

Mirtec's sign frames are made by standard extrusions that can accept a variety of insert materials with a small degree of flexibility, such as vinyl, acrylic, wood veneer, paper and aluminum.

All of Mirtec's frame sizes are manufactured in a number of standard sizes and are given a part number (Mir2122) can be seen in the size chart on each of our sign specification sheets.

Portrait H x W

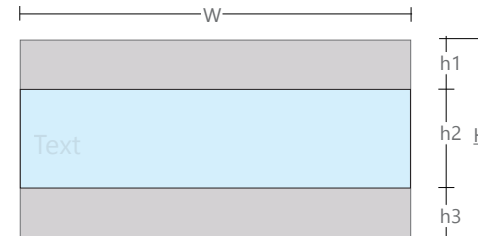

where the width marked (W) is constant
The height (H) is dynamic per your choosing

Panel system			
	Insert w 2	Extrusion <u>W</u>	Max insert thickness IT
1	4"/102mm	7.36"/187mm	0.01"/2.5mm

Landscape H x W

where the width marked (H) is constant
The height (W) is dynamic per your choosing.

Panel system			
	Insert h 2	Extrusion <u>H</u>	Max insert thickness IT
1	1.65"/42mm	3"/76mm	0.01"/2.5mm
2	1.65"/42mm	4"/102mm	0.01"/2.5mm
3	1.65"/42mm	5"/127mm	0.01"/2.5mm
4	4"/102mm	7.36"/187mm	0.01"/2.5mm
